Areas of Service

Our Solutions

Abacus WMS

Abacus WMS is a modern cloud-based application designed to enhance the efficiency of warehouse inventory and spare parts management, as well as asset and operational inspections. It comes with a robust reporting module for project tracking and KPIs. The software is also easily deployable for project-based maintenance and operational spare parts identification and tracking. The Abacus Inspection Explorer can be customised to meet our client's inspection requirements.

Abacus APM

Asset Performance Management solution, coming soon in 2025, stay tuned.
